MV-PRIME™

MOBILE CONDITION ASSESSMENT SYSTEM

MV-PRIME™

"The new system has led to much more reliable data and high quality assurance. Now we can quickly respond to changing requirements and share information quickly. More of our time can now be spent on data analysis rather than data entry. We now have our capital plan and reports at our fingertips."

— Cheryl Francis,
New York City School Construction Authority

MV-PRIME, the **leading tool for streamlining the condition assessment process**, enables instantaneous data collection and reporting from mobile devices.

Use MV-PRIME to:

- **Increase speed of data collection**
- **Ensure accurate reporting**
- **Create concise digital records on the spot**
- **Provide a custom workflow for your process**
- **Increase productivity**
- **Save time and money**

Thousands of Inspections Performed Annually
Over 125,000,000 SF in Assets Inspected
Data to Decision – Fast, Accurate, Reliable

MV-PRIME™ MOBILE CONDITION ASSESSMENT SYSTEM

FEATURES ➡ BENEFITS

| FEATURES	BENEFITS
Mobile inspections include custom reference information	Eliminate paper forms, manuals
Built in logic supports custom workflow	Design and execute custom inspections
